PROFILE

Excellent troubleshooting skills with the ability to analyze code to produce the most cost-effective solutions. Self-starter and problem solver with a strong knowledge of modular and object-oriented design.

EXPERIENCE

Richmond, BC
September 2017 - Present

Front End Web and iOS Developer
Roomia Realty Inc.

- Design and develop cross-compatible, front end web components with **React**, **Redux**, **Webpack** and **Material UI**.
- Work closely with project manager, designer and back end developer on the **full development cycle** of Roomia.
- Exercise **test-driven development** to deliver high-quality projects in a high-demand setting using Capybara and RSpec.
- Re-design and maintain companion app for the iOS via **Swift** and **Realm**
- Involved in **data model planning** and **API design** to provide input on code reuse.
- **Provide mentorship** to junior developers on best practices and good coding standards.
